

## Products of POLYGON CHEMICAL LTD.

### Antioxidants

The product list is not complete. The statements made do not dispense the reader from verifying them.

<b>Product name</b>	<b>Properties</b>
POLYGON PC 1190	New highly efficient antioxidant: complexes heavy metals, prevents the formation of radicals. Good solubility in many organic media (oils, fats, surfactants, apolar solvents etc.); limited solubility in water; very good thermal stability
TENSAN AO	Stabiliser; prevents catalytic effects of heavy metals (Cu, Fe, Ni) in certain decomposition and oxidation processes in organic substances (e.g. unsaturated fatty acids). It binds free metal ions and by this retards the decomposition process.
