

Hydrophobing agents

The product list is not complete. The statements made do not dispense the reader from verifying them.

Product names	Application	Properties
POLYGON PC 1236	Highly molecular hydrophobing agent for car care.	Blend of amphoteric and cationic surfactants, miscible with water in any ratio. Applied as hydrophobing agent in automated car washing and as additive in car care products.
POLYGON PC 2002	Concentrated drying aid for car care. Regenerates embrittled painted surfaces and improves dripping off of water.	Excels in its long lasting conservation effect. Ready-made, water dilutable concentrate.
POLYGON PC 2006	Concentrated drying aid for car care. Regenerates embrittled painted surfaces and improves dripping off of water.	Ready-made, water dilutable concentrate.
POLYGON PCG 1203	Hydrophobing glass, ceramics, metal; high gloss drying aid for cars, particularly for automated car wash	Free of hydrocarbonic solvents, silicones, and dimethyl distearyl ammonium chloride. Used for car care. 10% concentrate, can be diluted up to 1:2'000. Antistatic properties on plastic.
POLYGON PCG 1414	Ready-made formulation of a hydrophobing agent based on POLYGON PCG 1203	15% concentrate, can be diluted up to 1:1'000. Antistatic properties on plastic.
POLYGON PCG 1443	Hydrophobing glass	Builds up easy-to-clean surfaces
POLYGON PCG 1872	Hydrophobing glass, ceramics, metal; high gloss drying aid for cars	Readily biodegradable. 10% concentrate, can be diluted up to 1:2'000. Regenerating embrittled painted surfaces, free of hydrocarbonic solvents, silicones, dimethyl distearyl ammonium chloride. For car care. Increases dripping-off of water from shower cubicle; antistatic effects in plastic cleaners.
POLYGON PCG 1883	Hydrophobing glass, ceramics, metal; high gloss drying aid for cars	Readily biodegradable; even faster dripping-off of water. 10% concentrate, can be diluted up to 1:2'000. Regenerating embrittled painted surfaces, free of hydrocarbonic solvents and dimethyl distearyl ammonium chloride. For car care. Increases dripping-off of water from shower cubicle; antistatic effects in plastic cleaners.
POLYGON PCG 1941	Ready-made water-dilutable concentrate on basis of POLYGON PCG 1883.	same as POLYGON PCG 1883.
