

## **FORMULATIONS FOR CONVEYER BELT LUBRICANTS**

### **Super concentrated conveyor belt lubricant**

POLYGON PC1726	54.0%
glacial acetic acid	36.0%
IPA (isophthalic acid)	10.0%

Dissolve at room temperature. Important to use glacial acetic acid to get a liquid.

Dosage: 130 mg/m<sup>3</sup>

Does not go through a gel phase during dilution; therefore product can be given as a super concentrate to the end-user.
