## Specialties

<b>BIOMADE BB</b>	<i>BEHENYL BEHENATE</i>	Efficient structuring agent for deodorants and other solid products (e.g. sticks) made from a naturally derived waxy ester with a melting point of 73°C. Excellent alternative to synthetic materials; waxes from fossil fuels and functional substitute for microplastic waxes. It creates a velvety skin feel. NOI 1.0
<b>CUPL PIC</b>	<i>PPG-2 ISOCETETH-20 ACETATE</i>	Water soluble emollient, acts as o/w emulsifier; unique fragrance solubilizer.
<b>DERMOL 2022</b>	<i>OCTYLDODECYL BEHENATE</i>	Extremely substantive emollient ester. Its silkiness makes it suitable for both skin and color cosmetics such as creams, lotions, sun products and make up products.
<b>DERMOLAN GLH</b>	<i>GLYCERETH-7.5 HYDROXYSTEARATE</i>	Lanolin alternative; self-emulsifying; coupler for hydro-alcoholic products.
<b>DERMOWAX BGS (MB)</b>	<i>BUTYL STEARATE (AND) GLYCERYL STEARATE (AND) STEARYL STEARATE</i>	Blend of three common emulsifiers.
<b>DERMOWAX PGMS</b>	<i>PROPYLENE GLYCOL STEARATE</i>	Water and alcohol miscible.
<b>HETESTER SSS</b>	<i>STEARYL STEAROYL STEARATE</i>	Solid emollient for use in stick products.
<b>MULLS 2218</b>	<i>BEHENOYL STEARIC ACID</i>	Co emulsifier; adds temperature stability in o/w emulsions. NOI 1.0
<b>WAXENOL 801</b>	<i>ARACHIDYL PROPIONATE</i>	Alternative to lanolin; enhanced pigment payout.
<b>WAXENOL 821</b>	<i>SYNTHETIC BEESWAX</i>	Replacement for beeswax; adds structure and body.

CUPL®, DERMOL®, DERMOLAN®, DERMOWAX®, HETESTER®, MULLS® and WAXENOL® are registered trademarks by ALZO International Inc. (USA)

## Waxy Texturizer

DERMOL CL (MB)	CETYL LACTATE	Soft wax; builds viscosity in emulsions; ideal for lip and make-up.
DERMOL ICB	ISOCETYL BEHENATE	Odorless and tasteless; slip, lubricity for solids and barrier creams.
DERMOL MM	MYRISTYL MYRISTATE	Substantively, adds body and velvety feel.
DERMOL OE (MB)	OLEYL ERUCATE	Liquid wax; pigment spreading, adds sheen and luster to color cosmetics. NOI 1.0
DERMOWAX SB (MB)	STEARYL BEHENATE	Bodying agent; high MW suggests low irritation.
POLYPON GS	GLYCERYL STEARATE	Co-emulsifier and consistency agent for stabilizing emulsions.
POLYPON HCO	HYDROGENATED COCONUT OIL	Triglyceride of saturated coconut fatty acids, consistency agent for creams, milk, ointments and sticks.
